Water is essential for health, work, and the environment.

Did you know:

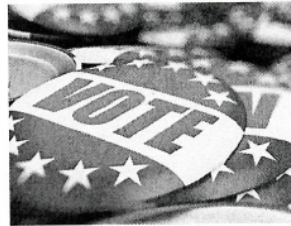

We are blessed with the ability to turn on a faucet and have clean water run out if it, it can sometimes be hard to remember that it's important to save water. Most of the water on the Earth is very expensive to make safe and deliver to our cities, so it's important that we use the water that we have wisely!

Agriculture is responsible for 80% of water used in the United States

Watering lawns, shrubs, and trees with more water less often encourages them to grow deep roots.

The U.S. uses 9 billion gallons of water per year on our yards.
